Dear Norbert,

I am reaching out as our ESIN (European Small Islands Federation) board is very keen to include more small European islands in our work. The Frisian Islands and Pellworm in particular seem a really good fit for our aims and ambitions which is to work together to address the issues of island sustainability, including population retention, Clean Energy and Climate change.

I am pleased to let you know that we have joined the consortium headed by Climate Alliance for phase 2 of the Clean Energy Secretariat together with FEDARENE and CPMR island collages and commission, and that we are hoping to work with all the small islands of Europe on their transition agenda should we be successful, which I sincerely hope we will be with so many island organisations involved.

We would be keen to know if you would be interested for Pellworm to join ESIN as an associated member. There will be an opportunity for you to discover more about our work at our virtual AGM on 17-20 November 2020.

We would be happy to send you more information about membership and the AGM if this is of interest to you and your island.

Warm wishes,

Camille
